

Care Instructions -

1. Ensure guy ropes are out at all times during use
2. Never pack your tent away wet. If you must take your tent down when wet, ensure that it is dried completely as soon as possible to prevent mildew forming
3. If mildew does form on your tent, wash off with warm water and a soft brush to prevent further growth, do not use soap or detergents
4. Do not use an open flame inside your tent. The fabric has been treated with a fire retardant but is in no way fire proof
5. Clean all pegs and poles before storing
6. This tent is not designed to withstand storm conditions. During strong winds, it is recommended that the tent be taken down
7. Do not leave your tent pitched unnecessarily for extended periods of time, UV light damages the fly and will shorten the life of your tent

Condensation -

It is important that lower vents are opened at all times to reduce the risk of condensation. During humid or damp conditions, it is recommended that inner door covers are opened to expose the mesh layer to allow additional airflow throughout your tent.

Do not use foam swabs or non bonded mats directly on the tent floor. This will cause condensation between the mat and floor and if not dried out can lead to mildew foaming.

2 Year Tent Guarantee -

Please take time to read about the protections we offer you

All our tents come with a guarantee designed to protect you as our valued customer. Flow Imports Ltd, the makers of Zempire Camping Equipment tents, will repair or replace this tent, at their discretion should it fail due to faulty materials or manufacture for a period of 2 years from the date of sale.

The Guarantee is subject to the following conditions:

1. The Guarantee only applies to an original purchaser who purchased this tent from an approved retail outlet
2. The Guarantee does not apply if the tent has been used for anything other than reasonable personal camping use. Commercial use (e.g. rental) or continuous use as a residence are expressly excluded
3. Damage due to normal wear and tear, accident, acts of God, negligence (other than by Flow Imports Ltd), failure by the purchaser to ensure instructions for setting up and care are observed, deterioration due to abnormal exposure to ultraviolet light, insect or mildew attack, or any other cause reasonably beyond the control of Flow Imports Ltd are not covered
4. If redress is sought under the terms of this Guarantee, then the tent must be returned by the purchaser to the outlet from where it was purchased within the Guarantee period, in a clean, dry state and with proof of purchase
5. All transport costs and any other indirect costs are excluded from the Guarantee.
6. Flow Imports Ltd reserves the right to make a reasonable charge for repairs which it determines are not within the scope of the Guarantee
7. The Guarantee does not limit, modify or exclude any rights under any law if doing so would contravene that law or make any part of this Guarantee invalid. However, Flow Imports Ltd:
 - a) excludes (to the extent permitted by applicable law) all conditions and warranties that might otherwise be implied; and
 - b) limits its liability for breach of any such condition or Guarantee that it cannot exclude together with its liability under the Guarantee, to repairing or replacing the Goods or paying the cost of having the Goods repaired or replaced (at Flow Imports' option).

This tent has been made with meticulous care and attention to detail. Providing it's properly looked after and correctly stored, it will help you enjoy all that nature has to offer for years to come.

Get out more - you owe it to yourself.

Tested in New Zealand. Made with care in China

INSTRUCTIONS

- 1 Test run**
Practice pitching your Aero T Shade at home to ensure you understand the process
- 2 Siting**
You will need to ensure that you locate your tent so that you have sufficient space in front of your tent to attach your shade. Ideally you will require 4m to pitch correctly. If possible position your tent with the front door facing away from the prevailing wind. Also try not to pitch your tent under trees as falling branches can damage the tent and falling sap can damage the fabric.
- 3 Unpacking**
When you take your Roadie out for the first time take a moment to see how it is packed or take a photo on your phone. This will help you when it comes to packing your tent away. Separate and identify the different parts in your tent. The package should include the following
 - Shade Fly
 - Guy Ropes (Pre Attached)
 - Pegs
 - Steel Pole
- 4 Pole Assembly**
Assemble the steel Shade pole. The sections are joined together with shock cord so just needs slotting together. Ensure that the sections do not snap together and each section inserts fully into the adjoining pole.
- 5 Layout**
Unroll the shade with the pole sleeve at the front shinny PU coated side facing down. Lay the non pole sleeve end over the front pole of your tent. You should have an overlap of at least 40cm. Peg down the pre attached guy ropes on either side of your tent
- 6 Pole Out**
Thread the steel pole through the pole sleeve that runs across the front of the shade. Insert the steel pins attached to the webbing into the base of each pole end. Clip the plastic C Clips around each side of the pole.
- 7 Peg Out**
Peg out the base of each pole through the webbing loop. It is important that the webbing is taught between each end of the pole and that the pole sit perpendicular to the front of the tent.
- 8 Guy Out**
Peg out the two guy ropes attached to the front of the Shade. These guys should be pegged out at 45° and the pegs should also be inserted at a 45° angle.
- 9 Windy Conditions**
Although your shade is made from quality materials, it is not designed to be used in stormy conditions. Common sense should be used when deciding to take down your shade in windy conditions.
- 10 UV Degradation**
Tent fabrics can be weakened from prolonged exposure to sunlight. Under normal holiday use your Zempire ® tent will give you many years of camping enjoyment, but use for extended periods of strong sunlight will cause degradation. It is recommended that during periods of strong sunlight a Zempire ® roof cover is used to help protect from UV damage. UV Degradation is not covered under warranty. The warranty does not cover permanent sites, displays or for commercial purposes.
