

## PITCHING INSTRUCTIONS - NEO 6

1. Ensure guy ropes are pegged out at all times during use
2. Never pack your tent away wet. If you must take your tent down when wet, ensure that you dry your tent completely as soon as possible to prevent mildew forming.
3. If mildew does form on your tent wash off with warm water and a soft brush to prevent further growth. Do not use detergents.
4. Do not use an open flame inside your tent. The fabric has been treated with a fire retardant but is in no way fire proof
5. Clean all pegs and poles before storing
6. This tent is not designed to withstand storm conditions. During strong winds, it is recommended that the tent be taken down
7. Do not leave your tent pitched unnecessarily for extended periods of time. UV light damages the fly fabric and will shorten the life of your tent

### Flow Imports Ltd General Warranty

Subject to the exclusions and limitations set out below, Flow Imports Ltd will repair or replace (at its choice) merchandise supplied by Flow Imports Ltd ( Goods) which fail due to faulty materials and manufacture during the warranty period.

#### The following exclusions and limitations apply to the Warranty:

The Warranty does not apply except to an original purchaser who purchased Goods new from a retail outlet.

The Warranty does not apply if:

- (a) a different product specific warranty is provided by Flow Imports Ltd; or
- (b) the Goods are not made by Flow Imports Ltd and an express warranty is provided by the maker of the Goods

The Warranty does not apply if the Goods have been used other than for reasonable personal camping use. Use in a commercial context ( e.g. for rental or use by a commercial organization in its business operations ) or continuous use in a domestic context are expressly excluded.

Damage due to reasonable wear and tear, accident, acts of God, negligence ( other than by Flow Imports Ltd), failure by the purchaser to ensure instructions for use and care are observed, deterioration due to abnormal exposure to the elements, insect or mildew attack, or any other cause reasonably beyond the control of Flow Imports Ltd are all excluded.

Goods must be returned by the purchaser to the outlet from where they were purchased within the Warranty period, in a clean state with proof of purchase.

All transport cost and any other indirect costs are excluded from the Warranty. Flow imports Ltd reserves the right to make a reasonable charge for repairs which it determines are not within the scope of the Warranty.

The Warranty does not limit, modify or exclude any rights under any law if to do so would contravene that law or make any part of this Warranty invalid. However, Flow Imports:

- (a) Excludes (to the extent permitted by applicable law) all conditions and warranties that might otherwise be implied; and
- (b) Limits its liability for breach of any such condition or warranty that it cannot exclude together with its liability under Warranty, to repairing or replacing the Goods or paying the cost of having the Goods repaired or replace ( at Flow Imports' option).

# INSTRUCTIONS

**zempire**  
BY FREEDOM  
CAMPING

**1.** Clear your site making sure there are no sharp objects where you are going to pitch your tent. Try to get a site that is as flat as possible. Spread out the inner tent (White), the main door is located at the front.

**2.** Assemble the 5 pole sections. Ensure that the poles do not snap together.

**3.** Thread the **RED** poles through the pole sleeves that run diagonally across the centre of the tent. Insert the ends of the poles into the pins located below each pole sleeve. Attach the C clips around the poles

**4.** Thread the **BLUE** poles through the pole sleeves on either side of the dome you have just created. Insert the pole ends into rings. Attach the C clips around the poles.

**5.** Thread the **GREEN** poles through the pole sleeve at the front of the tent. Insert the pole ends into rings. Attach the C clips around the poles.

**6.** Peg out all the peg points around the inner tent. The peg points at the base of each pole should be pegged through the webbing loop rather than the ring.

**7.** Pull the fly over the inner tent. The **ORANGE** webbing loops indicate the front of the fly. Connect the velcro loops inside the fly around the cut outs on the corresponding pole sleeve.

**8.** Attach the elastic loop over the existing inner pegs. Where there is no existing peg, peg the fly directly into the ground ensuring there is significant space between the inner and fly.

**9.** It is recommended that guy ropes are pegged out at all times and windows are opened whenever possible to allow adequate ventilation.

**Insert pegs at a 45° angle**
