

WARRANTY & CARE

2 Year Guarantee

Please take time to read about the protection we offer you

All our products come with a guarantee designed to protect you as our valued customer. Flow Imports Ltd., the makers of ZEMPIRE® Camping Equipment, will repair or replace this product, at their discretion, should it fail due to faulty materials or manufacture for a period of 2 years from the date of sale.

The Guarantee is subject to the following conditions:

The Guarantee only applies to an original purchaser who purchased this product from an approved retail outlet.

The Guarantee does not apply if the product has been used for anything other than reasonable personal use. Commercial use (e.g. rental) or continuous use are expressly excluded.

Damage due to normal wear and tear, accident, acts of God, negligence (other than by Flow Imports Ltd.), failure by the purchaser to ensure instructions for setting up and care are observed, deterioration due to abnormal exposure to ultraviolet light, insect or mildew attack, or any other cause reasonably beyond the control of Flow Imports Ltd. are not covered.

If redress is sought under the terms of this Guarantee, then the product must be returned by the purchaser to the outlet from where it was purchased within the Guarantee period, in a clean, dry state and with proof of purchase.

All transport costs and any other indirect costs are excluded from the Guarantee.

Flow Imports Ltd. reserves the right to make a reasonable charge for repairs which it determines are not within the scope of the Guarantee.

The Guarantee does not limit, modify or exclude any rights under any law if doing so would contravene that law or make any part of this Guarantee invalid. However, Flow Imports Ltd.:

- a) excludes (to the extent permitted by applicable law) all conditions and warranties that might otherwise be implied; and
- b) limits its liability for breach of any such condition or Guarantee that it cannot exclude together with its liability under the Guarantee, to repairing or replacing the Goods or paying the cost of having the Goods repaired or replaced (at Flow Imports' option).

This product has been made with meticulous care and attention to detail. Providing it's properly looked after and correctly stored, it will help you enjoy all that nature has to offer for years to come.

Get out more – you owe it to yourself!

Zempire®  **BOMBERPAD™**
CAMPING EQUIPMENT SELF-INFLATING MAT

INSTRUCTIONS

Zempire®
CAMPING EQUIPMENT 

INSTRUCTIONS

BEFORE FIRST USE:

The first time you use a new Bomberpad^{3D}, it will take longer than normal to inflate. This is because the mat has been stored in a compressed state for an extended period of time. We recommend taking the following steps before first use:

1. Unroll the mat on a flat surface.
2. Fully open the valve (as pictured) and allow the mat to self-inflate for up to 30 mins.
3. Turn the valve to inflate mode (as pictured) and inflate to maximum capacity by blowing air into the mat by mouth.
4. Once the mat is fully inflated, secure the valve cap and store overnight.

NOTE: Inflation speed will continue to improve with use as the foam will regain its expanded state "memory".

NORMAL USE:

To Inflate:

1. Unroll the mat on a flat surface.
2. Fully open the valve (as pictured) for maximum airflow. The internal foam will expand, allowing the mat to self-inflate.
3. When the mat is fully inflated, turn the valve to inflate mode (as pictured). To obtain extra firmness, blow air into the valve by mouth until the mat has reached your desired firmness.
4. Secure the outer valve cap.

To Deflate:

1. Open the valve cap and rotate the valve to deflate mode (as pictured).
2. Fold the mat in half, and then in half again, and apply your body weight to expel as much air as possible.
3. Roll the mat towards the open valve, this will force any remaining air out the valve.
4. Close the outer cap, secure the rolled mat with the included compression straps and insert into the carry bag.

CARING FOR YOUR MAT:

- For best performance, store the mat flat with the valve open. This will maintain the foam's fully expanded potential. This will also allow any moisture trapped in the interior to escape. If your mat must be stored in a rolled state, inflate the mat as frequently as is reasonable to prevent the foam from developing a compressed state "memory".
- If your mat is accidentally punctured, repair with the included adhesive or use a high-quality, flexible, urethane adhesive.
- To avoid mildew, never store your mat in a damp or wet environment. Be sure your mat is completely dry before storing.
- To clean your mat, use mild soap and warm water. Be sure to close the valve when cleaning to avoid getting any water into the mat. Let the mat air dry. Never place your mat in a washing machine or dryer.
- Keep your mat away from any open flames, sparks, embers, hot camp stoves, lanterns or other high heat sources.
- Avoid using your mat on sharp or abrasive surfaces.
- Do not use an air pump to over-inflate the mat as it may cause irreparable damage.
